# Juan Carlos Zepeda

SENIOR FULLSTACK DEVELOPER

React + Next + .Net C# + IA

## PROFILE

Senior Full Stack Developer with 8+ years of experience delivering scalable, high-performance end-to-end web applications. Expert in React, Next.js, TypeScript, and .NET Core, with deep expertise in system architecture, API design, and AI-driven solutions.
Proven track record of increasing application performance by up to 40%, optimizing frontend and backend systems, and accelerating development through scalable architectures and reusable components, driving measurable business impact in enterprise environments.

## EXPERIENCE SUMMARY

### SENIOR FULL STACK DEVELOPER
*Afore Principal (Feb 2022 - Mar 2026)*

Developed full stack widgets, libraries, and APIs with React.js, Next.js, TypeScript, .NET Core, C#, and SQL Server for internal enterprise systems. Designed robust REST APIs, implemented stored procedures, triggers, optimized databases, and reusable frontend components. Implemented full CI/CD with Docker, Azure DevOps, and automated deployments under agile workflows.

### SENIOR FULL STACK DEVELOPER
*AXA Assistance (Jul 2018 - Jan 2022)*

- Built scalable full stack applications using React & .NET
- Developed REST APIs and optimized SQL Server performance
- Implemented CI/CD pipelines with Docker and Azure Cloud
- Reduced system latency and improved performance

### FULL STACK DEVELOPER
*SEP (Jul 2016 - Jun 2018)*

Developed and maintained enterprise administrative systems with .NET, C#, and SQL Server. Built Web APIs, responsive interfaces, and backend solutions, consolidating full stack expertise for government systems.

México - Toluca

## EDUCATION

**COMPUTER SYSTEMS ENGINEERING**
*University, Mexico (2004 - 2009)*
**Professional License: 09635092**

*Certifications*

**React JS Advanced / Next.js**

**Azure Fundamentals AZ-900**

**Scrum Fundamentals**

**AWS S3 & Cloud**

*Languages*

Espanish — Native

English — B2 (conversation fluent)

## TECHNICAL SKILLS

- **FrontEnd:** React, Next.js, TypeScript, JavaScript, Angular, EmacScript 6+, HTML5, CSS3, SASS
- **BackEnd:** .NET Core, .NET Framework, C#, VB, Node.js, Express, ASP.NET Core, Python, PHP
- **Cloud & DevOps:** AWS, AWS Lambda, S3, Azure Cloud, Vercel, Docker, CI/CD, GitHub Actions
- **Databases:** SQL Server, PostgreSQL, MySQL, Stored Procedures, Views, Triggers
- **IA:** AI Agents, Chatbots, LLM Integration, GitHub Copilot
- **UI/UX:** Tailwind CSS, Material UI, Bootstrap, Figma, Responsive Design
- **State & Tools:** Redux, Zustand, Vite, Webpack
- **Testing:** Jest, Cypress, Testing Library, Storybook
- **APIs & Security:** REST API, SOAP, GraphQL, JWT, OAuth2, OWASP

# Juan Carlos Zepeda

SENIOR FULLSTACK DEVELOPER

React + Next + .Net C# + IA

## PROFESSIONAL EXPERIENCE

### SENIOR FULL STACK DEVELOPER

*Afore Principal (Feb 2022 - Mar 2026)*

Developed full stack with React.js, Next.js, TypeScript frontend and .NET Core APIs, C# backend, SQL Server databases.

Built scalable REST APIs with .NET Core 6/7/8, handling ACID transactions, JWT authentication, and data validation.

Implemented reusable frontend components consumed as libraries, integrated with backend APIs and Next.js Server Actions.

Designed and implemented stored procedures, triggers, indexes, and optimized queries in SQL Server for data integrity and performance.

Designed and implemented stored procedures, triggers, indexes, and optimized queries in SQL Server for data integrity and performance.

### SENIOR FULL STACK DEVELOPER

*AXA Assistance (Jul 2018 - Jan 2022)*

Implemented front-end security using JWT and OAuth2, along with integrations with AWS Lambda and connected backend services.

Refactored legacy front-end systems into modern solutions using Next.js, TypeScript, and scalable component patterns.

Designed and implemented robust REST APIs with .NET, integrating multiple external roadside assistance and towing providers with secure transactions.

Implemented responsive and reusable user interfaces, collaborating with UX/UI, backend, and product teams to deliver new features.

Migrated modules and applications to Azure through CI/CD pipelines, controlled deployment flows, and progressive platform modernization.

Applied SOLID principles, clean code, technical documentation, and best practices across frontend components, backend APIs, and business workflows.

### FULL STACK DEVELOPER

*SEP (Jul 2016 - Jun 2018)*

Designed and implemented SQL Server databases with stored procedures and optimized queries.

Worked within Scrum frameworks using Azure Boards, Azure Repos, Git, version control, code reviews, and continuous task tracking.

## FEATURED PROJECTS

**Developed an intelligent simulation and recommendation widget powered by OpenAI, enabling users to explore financial scenarios and make informed decisions within the platform.**

**Integrated front-end + back-end systems with external roadside assistance and towing service providers, enabling real-time visibility of availability, status, and operational data, and implemented a support chatbot to improve user experience and guidance.**

**Refactored and migrated legacy modules to React, Next.js, and TypeScript with strong back .NET , deploying them to Azure via automated pipelines and controlled environments to improve scalability and maintainability.**
